Experience

Government Technology Agency of Singapore — *Singapore*

Software Engineer II — *Jul. 2025 - Present*

- Maintained and enhanced the Singpass Developer Portal (SDP) as part of the Singpass Partner Experience Team, supporting thousands of partners in configuring their Singpass integrations.
- Migrated the legacy billing system to a new platform, enabling more flexible pricing management and reducing invoice loading times by over 95%.
- Retired over 20,000 lines of legacy code through the billing migration, eliminating over 1,000 SonarQube-reported vulnerabilities and code quality issues.
- Coordinated across teams to deliver feature support and migrations for integrating Myinfo Business and Sign with Singpass into SDP.
- Contributed to an internal Centralised JWKS Service to standardise validation and governance of partner JSON Web Key Sets.
- Contributed to SDP's Contact Hygiene system, requiring partners to maintain reachable email addresses to support reliable communication from Singpass.
- Prototyped a Claude skill to guide partners through Singpass integration.
- Developed a Claude skill for end-to-end development, covering requirement clarification, planning across commits and merge requests, implementation after approval, and iterative self-review before opening draft merge requests for human review.

Zendesk — *Singapore*

Senior Software Engineer — *Nov. 2023 - Jun. 2025*

- Maintained a CLI tool enabling Zendesk engineers to manage and run end-to-end tests across multiple platforms throughout the development lifecycle.
- Integrated the CLI tool with Zendesk's internal frameworks and developer tools.
- Developed a Spinnaker plugin to automatically discover and run tests through Jenkins pipelines during deployment.
- Supported internal users of the team's testing tools, helping engineers resolve issues and improve productivity.

Sea Ltd. (Previously known as Garena Online Pte. Ltd.) — *Singapore*

Engineer/Senior Engineer, Web Full Stack — *Jun. 2019 - Nov. 2023*

- Developed and maintained multiple internal applications using Python (Django) Javascript/Typescript (React), and MySQL.
- Led and mentored multiple Backend developers in a project to revamp company's procurement system that will improve multiple workflows and better maintainability of the codebase.
